Job market paper

Cash transfers and fertility: from short to long run (with Lidia Cruces)

Many developed countries are at risk of experiencing population decline because of low fertility rates, with potential negative economic effects. As a response, governments are deploying family policies to increase the number of children. In this paper, we propose a dynamic life-cycle model of fertility and female labour force participation to assess their effectiveness. We use the short-run fertility effects of a cash transfer policy from Spain to calibrate its parameters. Using the calibrated model, we find that the effects in the long run are half as large as in the short run. This is driven by differences in the responses of younger and older women at the time of implementation. The former do not have a lot of margin to adjust their fertility and must do it in the short run, which generates additional births that do not occur in subsequent periods as younger women adjust their fertility gradually. We also study the effects of an alternative policy consisting of childcare subsidisation, and explore

how the coexistence of temporary and permanent contracts in Spain, which have different earnings profiles, affects fertility and interacts with cash transfers, by raising the costs of career interruptions in crucial child-bearing years.

Working papers

The Sex Ratio, Marriage, and Bargaining: A Look at China

Revision Requested, Review of Economic Dynamics

• Nominated for best early-career paper at the 1st International Workshop on the Chinese Development Model (Barcelona, Spain, July 2022).

Work in progress

A Theory of Structural Change, Home Production and Leisure (with Fenicia

Cossu, Alessio Moro and Silvio Tunis)

Family Policies and Social Security (with Lidia Cruces)

Presentations

2022: IX Workshop on Structural Transformation and Macroeconomic Dynamics (Cagliari, Italy), 1st International Workshop on the Chinese Development Model (Barcelona, Spain) 2021: Macroeconomics Working Group at the European University Institute (online), 34th Annual Conference of the European Society for Population Economics (online), 2nd Brazilian Meeting in Family and Gender Economics (online), CRENoS Workshop (Asinara, Italy), 46th Symposium of the Spanish Economic Association (Barcelona, Spain). 2020: Virtual Macro-Development-Trade-Environment Reading Group Workshop at Iowa State University (online). 2019: XXIV Workshop on Dynamic Macroeconomics (Vigo, Spain), Macro Seminar at the University of Mannheim, 44th Symposium of the Spanish Economic Association (Alicante, Spain).
